ASSURANCE STATEMENTS

- Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- Each principal investigator has considered alternatives to painful procedures.
- This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- The attending veterinarian for this research facility has appropriate authority to ensure the provisions of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

*The procedures included the intratracheal inoculation of rabbits with S. aureus to induce pneumonia. The withholding of antibiotics, analgesics or other pain/distress reducing drugs is based upon a publication by Raghavan and Kellum which indicates that an intervention with analgesia affects clinical outcomes of infection and interferes with the evaluation of virulence of the leukotoxin deletion mutant. Additionally, a clear description of the frequency of animal observations and the clinical signs of the rabbits that will require immediate euthanasia were provided.*

#### Exceptions to the exercise plan for dogs

A total of 28 dogs were housed in metabolic cages during the reporting period. These animals are exempted from the canine exercise program. Metabolism dogs are chronically catheterized and continuously monitored via computer. The jacket system precludes large caging in order to minimize problems with the various instrumentation. The exemption from the exercise requirement has been approved by the University of Mississippi Medical Center's IACUC and verified by the LAF veterinary staff.
